

Chloes Marcie satchel

Chlo's Marcie satchel has always been a fav among those to whom Spring and Summer seasons means nothing short of fashion. Bearing Chloe's signature horseshoe design, the handbags draws your attention with brute force of appeal and a sheer tantalizing charm about them.

But the spring collection for 2011 is certainly different in that the items have been designed in a way that you are forced to wait eagerly till spring arrives and wonder about the brooding winter. While the off-white shade is sure to make you perceive the lingering presence of chill, the color does not prevent you from flaunting your collection in different climates. Whichever country you are in, whatever landscape surrounds you, an item from Chloe's spring collection of Marcie is something you cannot give a miss.

The fact that Marcie is quite popular with Hollywood hotties like Rachel Bilson and Jessica Alba, adds a glow and a nasty aura to the common perception about Marcie handbags. Take the laser-cut bag in your hand or let it cling to your forearm, and you are aware you have changed.
